- Meeting Minutes
 - The Owner/Operator committee was announced at the 10/6/09 Houston LTUF meeting at ISA Expo in Houston. Those at the LTUF meeting and interested in the committee were invited to remain after the LTUF meeting.
 - Six people remained after the LTUF meeting to discuss owner/operator issues.
 - The committee discussed issues related to Intergraph SPI that are or particular interest to owner/operators.. For this first meeting, it was decided to simply list the issues of concern to the owner/operators represented at the meeting.

Houston LTUF Owner Operator Committee

■ Identified Issues

- Managing multiple as-built databases.
 - Use (and acceptance) of SPI by Maintenance and Operations.
 - Getting data from package vendors incorporated into As-built.
 - How is SPI being incorporated into owner/operator work flow? (One example is using SPI for mechanical equipment information and then sending that information to SAP).
 - Should SPI be able to handle heavy text-based specifications?
 - Migration of legacy information into SPI.
 - Management support of SPI.
 - Where does owner/operator find administrators who have sufficient time and training?
- **It was agreed that this was only a brief start for this committee. These minutes are to be distributed to all Houston LTUF members to determine the level of interest in an owner/operator committee to address issues such as those noted above.**
